

# How to stop the Nexus Service

To Stop the Nexus Service, you will need to complete the following:

1. Go to your start icon; type **services** in the search field and select **services** from the search results.

2. From the services list; locate **NexusDB Server V3**.
3. Right click on **NexusDB Server V3** and select **STOP**.

4. Once completed, restart the **NexusDB Server V3** through services.
